Two friends—Samuel J. Dickey and Gus. Fleming—residing in Shelby, Tennessee, got into a difficulty in a ten-pin alley, on the 20th. After abusing one another for some time, Fleming went out, borrowed a gun, returned and shot Dickey through the breast; when the wounded man seized another gun standing near, and shot his assailant through the heart—both men falling dead at the same instant, within twelve feet of each other.

The last hours for leaving Paris were marked by the rush of hundreds whose courage gave way at the latest moment. Hundreds of applications were made to Minister Washburne for passports by Frenchmen who were never outside of France, who pretended to be naturalized Americans, but were upable to produce Americans, but were unable to produce their papers.

REYNOLDS' IMPROVED METHOD OF CONSTRUCTING Artificial Dentures,

Artificial Dentures,

Patented December, 1867.

A FTER an extensive use of this important improvement in practice for nearly two years, it is with full confidence urged upon the profession and the public, as fulfilling more theroughly and satisfactorily than any other mode, every intention of Artificial Dentures.

As in this method, rubber teeth are altogether discarded, it is desirable that it should fall especially into the hands of those familiar with gold plate work.

It may not be generally known that they who wear cases of artificial teeth, constructed according to this patent, by Dentists who are not licensees, render themselves liable to the penalty of infringement, as well as the operator.

A LLDW me to call your attention to my PREPARATION OF COMPOUND EXTRACT BUCHU. The component parts are BUCHU, Long Leav, CUBEBS, JUNIPER BERRIES.

Mode of Preparation.—Buchu, in vacuo, Juniper Berries, by distillation, to form a fine gin. Cubebs extracted by displacement with spirits obtained from Juniper Berries; very little sugar is used, and a small proportion of spirit. It is more palatable than any now in use.

spirit. It is more palatable than any now in use.

Buchu, as prepared by Druggists, is of a dark color. It is a plant that emits its fragrance; the action of a flame destroys this, (its active principle,) leaving a dark and glutinous decection. Mine is the color of ingredients. The Buchu in my preparation predominates; the smallest quantity of the other ingredients are added, to prevent fermentation; upon inspection, it will be found not to be Tincture, as made in Pharmacopuia, nor is it a syrup—and therefore can be used in cases where fever or inflammation exists. In this, you have the knowledge of the ingredients and the mode of preparation.

Hoping that you will favor it with a trial, and that upon inspection it will meet with your approbation. With a feeling of confidence, I am, very respectfully.
